

DECORATIVE ALUMINUM ARMS

Specifications and Features:

Specifications

Pemco's Decorative Arms are constructed from aluminum sand castings. Castings are welded and heat treated, after weld, to a T6 hardness for maximum strength.

For all **wall mounted arms**, back plates are not pre-drilled at the factory. This allows installation contractors the ability to match mounting holes (by contractor) to specified mounting surfaces.

For **post/pole mounted arms**, a standard 3" x 5½" tenon is required (Pemco's T355).

Arm Orientation

Standard double arm orientation is 180°. Standard quadruple arm orientation is 90°. For triple arm configuration or custom orientation, please contact the factory.

Finish

Super durable polyester powder coat finish. Custom finishes, including patinas and all RAL colors (adder).

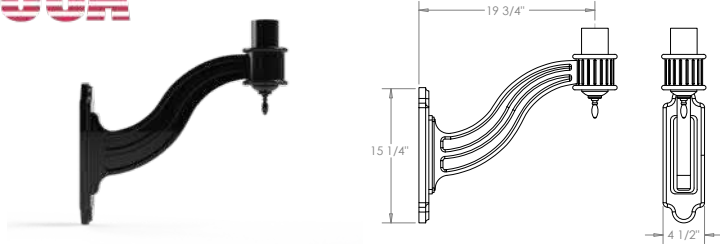

Warranty

5 year limited warranty
